NEW WHY CHOOSE RYNONE SATIN FINISH

- A Satin finish is inviting to the touch and less prone to glare. It creates a softer look than the Gloss finish. Colors are slightly subdued, like sea glass on a beach.
- Satin finishes look great in rooms with lots of natural light. The softer reflection creates a gentler aesthetic and ambience.
- A Satin finish can be more forgiving between cleanings. Minor topical conditions such as water spots and fingerprints are less conspicuous.
- Any accidental damage, like a scratch or scuff marks in a high-traffic area, would be less noticeable with the Satin finish.
- Start with beautiful Rynone cultured marble colors, then choose either a Gloss finish for a vibrant color saturation and contrast or the new Satin finish for a sophisticated and subtle option.

GROUP 3 COLORS

331 Fashion Gray

332 Ecru

Viewing colors on screen or in print may change appearance. These images are as close as possible to actual colors, and are meant to represent colors and patterns that do have variation. Abstract vein patterns are unique by design. Each patterned marble top is one of a kind.
